currently no medical test to  
diagnose autism. Rather,  
autism is diagnosed by  
observing a child's  
behavior and looking for  
specific symptoms.  
Researchers have been  
studying the earliest signs  
of autism in babies and  
toddlers so that doctors  
know what to look for, and  
so that children can get the  
help they need as soon as
